Hi Roger,

I pulled the Chemours and Not Responsive Based on Revised Scope info from the database and attached it for your update. Please fill in the blanks and update other fields as necessary. I can then update the database.

Good morning Susanne,

Per a mem from Christina Wadlington last week, I updated the two Region 3 PFAS site summaries. These would be the Chemours Washington Works in Parkersburg, WV and the Not Responsive Based on Revised Scope  
Sarah Kloss also made some updates to the DOD summaries. I do not have access to PFAS database you referred to. I will check with Rick Rogers and Jim Bennett to see if they can get me into the database.

Roger

**Subject:** ACTION: PFAS database updates

**Importance:** High

Hi Roger,

HQ requested the PFAS database be updated. There are 2 sites (Chemours and Not Responsive Based on Revised Scope) that are in the database that are not overseen by HSCD. Do you have any updates for these sites?

- Chemours has no info at all. Was there a drinking water exceedance? If so, what was done to mitigate? Is there any other info that should be included under "Notes"? We generally do not include much detail here, just a sentence or two.

**Not Responsive Based on Revised Scope**

Please let me know today if you have any updates. Or, let me know if you have no update.
